## Female Hormone Test

Hormones play an important role in your body by regulating every process.

Are you concerned about menopause, PMT, chronic fatigue, mood swings, poor memory or painful or irregular periods? Are your hormone levels effecting the way you feel? Find out now! The NLS Female Hormone Kit will measure your levels of estrogen, progesterone and testosterone through saliva testing.

## Male Hormone Test

Are you concerned about low energy, poor memory, erectile dysfunction, low muscle mass, weight gain, low libido, anxiety and depression? Do you want to restore balance and vitality? The NLS Male Hormone Kit will measure testosterone and DHEA levels through your saliva. Take charge now and find out why you feel the way you do!

## Stress Hormone Test

Working long hours, and feel there are not enough hours in the day? Feeling overloaded, anxious and irritable? Suffering from chronic fatigue, or just have low energy and low immunity? The NLS Stress Hormone Test Kit will measure you hormone levels for DHEAS and cortisol and can provide you with the answers to your questions and get you back on track!

## Sleep Hormone Test

Feeling tired, low in energy and irritable? Do you have interrupted sleep patterns and suffer from lack of concentration during the day? Are you waking up still feeling tired and not rejuvenated? Do you suffer from sleep disorders or perpetual jet lag? The NLS Sleep Hormone Test will measure your levels of melatonin (the hormone responsible for regulating sleep and waking cycles) through your saliva and help you achieve a normal sleep pattern.

## Prostate Test Kit

Men ....are you over 50 and concerned about your waterworks, frequent and urgent need to pass urine? Are you waking at night to urinate? Do you have a family history of prostate cancer? The NLS Prostate Test it is a convenient and simple way for men to regularly measure their PSA (Prostate Specific Antigen), and is a safe and effective aid in the detection of prostate disease.

## Food Allergy Test

Are the foods you eat making you sick? We've all heard the familiar saying you are what you eat! Certain foods can trigger immune responses which can cause stress even in a healthy body and potentially cause illness. Through a simple finger prick test, the NLS Food Allergy Test Kit will test 96 foods to identify what foods you need to avoid in your diet to minimize symptoms from unnecessary inflammatory processes due to daily exposure.

## Mineral & Toxic Element Test

Toxic metals & mineral imbalances in our bodies occur as a result of our environment and lives, and can seriously affect your health. Hair analysis is a reliable method for measuring mineral & trace element levels in the human body as well as testing for the presence of toxic materials. The NLS Mineral & Toxic Element Test uses a sample of hair to measure a range of minerals and toxic elements. Restore good mineral balance and vitality to your life, and help your body achieve optimum nutrition and health!

## MULTIPLE HORMONE TEST

Concerned about hormone levels? Want to restore balance and vitality?

A simple & convenient way to check hormone levels through saliva testing

Taking scientific testing to the home

## Multiple Hormone Test

The Multiple Hormone Test Kit is designed to offer practitioners a more flexible way to obtain tests results and tailor requirements to individual clients needs. The Multiple Hormone Test Kit includes two pre-paid hormones. If additional hormones are required, these are paid for on return of the request and sample. This allows the practitioner the flexibility to decide what hormones are to be tested depending on patient's needs.

## Drug Test Kit

The new Drug Saliva Test Kit provides a one-step, non-invasive method for the detection of multiple drugs in the body. This test kit simultaneously tests for the detection of amphetamine, methamphetamine, cocaine, opiates, marijuana and phencyclidines by measuring levels found in the saliva. This easy and convenient cutting edge technology, eliminates the problems associated with urine collection. The kit provides immediate, rapid, point-of-care diagnosis thus avoiding the other test methods.
